ACT GROUP FOR ANXIETY MANAGEMENT

If you find yourself struggling with worries, nervousness, stress, panic, or physical symptoms of anxiety (such as IBS, high blood pressure, headaches, or muscle tension/pain), you may benefit from this evidence-based treatment. This 10-session group will teach you how “common sense” reactions to anxiety are often the very things that keep you stuck, and how you can take **ACT**ion to feel better.

- Learn why your anxiety and stress persist despite your best efforts and what you can do differently to experience greater success
- Change your relationship with your own thoughts and feelings
- Identify the life choices most likely to help you minimize your suffering

Where: Integrated Behavioral Associates
169 Libbey Parkway Weymouth MA 02189
